

## Company Overview

Can-Technologies is an Engineering Services company specialized in providing Information Technology, Control, Electrical and Mechanical Engineering Solutions to a variety of Industries.

The industries that we provide Engineering Services to include:

- Automotive
- Consumer Products
- Environmental
- Infrastructure
- Mining & Metals
- Packaging
- Pharmaceutical
- Steel
- Pulp & Paper
- Cement and Lime
- Data Centres
- Food & Beverage
- Material Handling
- Oil & Gas
- Petrochemical
- Power Generation
- Water & Waste Water

We are a vendor neutral, customer focused company that recognizes the critical importance of team continuity and alignment with clients and their objectives, thereby ensuring that the best and most cost-effective solutions are utilized.

Partnership

Attention to Details

Support

Your Bottom Line

We provide a host of engineering and system integration services and have skilled and knowledgeable personnel with in depth domain experience and technical proficiency. This is coupled with the use of proven methodologies to help deploy solutions on-time and within budget.

Our project managers are results-oriented professionals who can reliably plan projects and then lead and manage them efficiently from start to finish

We keep current with the latest automation products and developments, information management technologies, and hardware and software tools.

We provide our customers with expertise in:

- Project Planning
- Project Management
- Conceptual, Preliminary and Detailed Design
- Material Procurement
- System Building
- Solution Implementation
- Test and Simulation
- Installation and Commissioning
- Training and Support

*"Providing Quality Services & Attention to Our Customer Needs."*

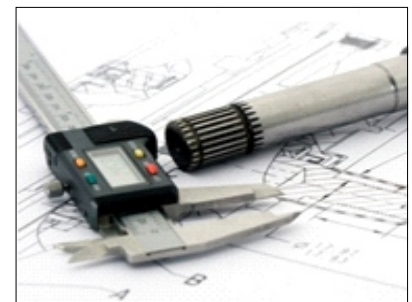

## Company Overview

System integration and control system programming and configuration is a core competency of Can-Technologies. The key to successful system integration is to first develop system specifications that will facilitate a seamless integration of the various hardware, software and networking components.

We work with customers to ensure technical specifications are detailed, complete, quality checked and fully documented. Test and Simulation, Factory Acceptance (FAT) and On-Site Acceptance Testing (SAT) programs are developed and as with technical specifications are fully documented.

In addition to new systems, we analyze existing control systems, recommend optimization methods or upgrade paths, provide migration plans and complete detailed design for system additions. We have in-depth knowledge of plant control systems (PLC and DCS), Monitoring and Supervisory Systems (SCADA/HMI) and control panel design.

The following is a category list of services that we provide:

- Electrical Systems
- Drives Systems
- Motion Control Systems
- Instrumentation Systems
- Control Systems
- Monitoring & Supervisory Systems
- Mechanical Engineering Services
- Software Solutions
- Custom Software Solutions
- Safety Services
- Energy Services
- Building Management
- Machine Vision
- Bar Code & RFID
- Industrial Network Design

Can-Technologies is authorized by the association of Professional Engineers of Ontario (PEO) to offer Professional Engineering Services, and is also a member of the Consulting Engineers of Ontario (CEO)
