

Food & Beverage

Food & Beverage companies are challenged with intense competition and tight margins and need to improve manufacturing efficiency without sacrificing product consistency, process downtime or waste.

In addition, with energy costs on the rise, the reduction of energy and operating costs are paramount for companies that wish to remain competitive and profitable

From Brewing to Bottling or Mixing to Baking Can-Technologies have been a trusted solutions provider implementing solutions that cover:

- Data Collection Systems
- Equipment Monitoring Systems
- Barcode/RFID Identification
- Vision Systems
- 21 CFR Part 11 compliance
- Bulk Material Handling
- Mixing Equipment
- Filling Equipment
- Batch Processing
- Sorting Systems
- Reject Systems
- Control System Upgrade
- SCADA Upgrade
- Process Improvements
- Equipment and Process Interfacing
- Software Design and Integration
- Safety Improvements & PHSR
- Power Quality Improvement
- Energy Monitoring and Management
- Manufacturing Execution Systems (MES)
- Genealogy and Track & Trace Quality Improvement

Whether you need to evaluate your plant processes, examine your hardware performance, or implement innovative solutions Can-Technologies can help.

Our approach includes the deployment of our industry specialists to understand your business processes and systems, and to perform upfront planning that can be used to define the scope, cost, payback and 'end-state' architecture.

The applications expertise, project planning, integration, execution and support services that we can provide will make your bottom line look better than ever by improving flexibility, speed-to-market and quality and consistency to deal with market fluctuations and changing customer requirements.

In addition, our engineering services team are able to use their energy systems expertise to provide energy efficiency and cost reduction solutions along with practical recommendations to show you how to reduce and controls costs, optimize equipment utilization and improve the bottom line.

Our Food & Beverage specialists can help you achieve a competitive advantage and hassle-free systems through innovative, integrated applications and superior project management.
